————— WEB DEVELOPER AND PROGRAMMER —————

Innovative, practical, accomplished, and experienced Web Developer/Programmer. Over 30 years programming experience with the last 15 years devoted to Internet Development.

————— LANGUAGES —————

Experienced in many current Web languages such as FLASH/ActionScript, Perl/CGI, CSS, HTML, XML, PHP, MySQL, JavaScript, jQuery, and Ajax/AHAH. Also experienced in several other languages for desktop applications (i.e., C, C++, FB, Xcode, Cocoa, Java).

————— SUMMARY OF QUALIFICATIONS —————

Skilled in creating user-friendly Web Sites providing customers with easy ways to find client services and products via: consistent Web Site navigation methods; Web Site search devices; product presentation schemes; product pricing and discount methods; and delivering various product information to the user "on call". This functionality is provided by the proper application of HTML, CSS, JavaScript, and Ajax/AHAH languages.

Proficient in making Web Sites perform properly, accurately, quickly, and securely. Such as: providing means to show product data via Web Sites as requested by the user (i.e., dynamic presentation); keeping track of inventory, sales, and customer data; providing user secure access to accounts; providing means for customers to purchase products; providing clients with access to their Web Sites for product/data management; and making Web Sites as secure as current technology allows. These features are provided by the proper application of PHP and MySQL languages as well as knowledgeable Database Design.

————— WORK EXPERIENCE —————

Sperling Corporation 1995 - Present
